

Experiment 1

Basic File and User Management Commands

Aim

To execute and understand the usage of **rm**, **users**, and **tree** commands in Kali Linux.

Theory

rm Command

The rm command is used to remove files and directories from the Linux file system.

Syntax:

rm filename

Example:

touch test.txt

rm test.txt

Users Command

Displays the usernames of users currently logged into the system.

Syntax:

users

tree Command

Displays directories and files in a tree-like structure.

Syntax:

tree

Procedure

1. Open Kali Linux Terminal.
2. Create a sample file.
3. Execute the rm command.
4. Execute the users command.
5. Execute the tree command.

Sample Output:

```
