

Experiment 4

Directory and File Display Commands

Aim

To execute ls, cat, and mkdir commands.

Theory

ls Command

Lists files and directories.

ls

cat Command

Displays file contents.

cat file.txt

mkdir Command

Creates a new directory.

mkdir EthicalHacking

Procedure

1. Create a directory using mkdir.
2. List files using ls.
3. Create a text file.
4. Display file contents using cat.

Result

Successfully executed ls, cat, and mkdir commands.
